(54) Device for the collection, testing and shipment of body fluid samples

(57) A drug abuse test kit has a transparent cup-like container (11) for retaining a fluid sample to be tested and the open top end (14) of the container (11) is closed by a closure cap (22) seated upon the open end (14). There is a slit (19) in the closure cap (22) to receive a multiple drug test card (25) having a plurality of immunoassay test strips thereon with visual endpoints to indicate presence or absence of a particular drug. The container (11) is provided with a second cover (15) which is solid and unslit to close and seal the container (11) when a sample therein is to be transported.
